

# SENIOR PORTRAIT EXPERIENCE

It's your senior year! This is one of the best times of your life! The next year will be full of learning, growing, planning, spending time with friends, and making memories that will stay with you forever. Enjoy every moment of it. Now let me help you capture this exciting time for you in your senior portraits.

My goal as your photographer is to capture you! Your personality, your hobbies and interests, what makes you who you are. I intend to capture the best version of yourself.

I have a serious passion for High School Senior Portraits. I love photographing seniors and graduates as they discover who they are, begin planning their futures, setting goals, and getting accepted to colleges. Senior year and graduation is a bittersweet time for parents, but I'm here to capture these last moments of your child before they take all that you've taught them and go on to become amazing, independent young adults. These sessions are meant to celebrate your senior and you for this extraordinary accomplishment!

# COLLEGE GRADUATES

My passion for photographing college graduates is immense. I love getting to know them, seeing where they come from, hearing how they have grown and what their futures hold for them. College graduation is truly one of the most special times in their lives. As parents we don't get to see our college students day to day lives, I'm here to capture that for you.
